

HCVID v2.0 — Product Overview

Dataset Overview

The Healthcare Contract Variance Intelligence Dataset (HCVID) v2.0 is a Platinum-grade, Class A operational transaction dataset containing 1,000,000 records across 12 intelligence domains. It provides comprehensive contract variance, reimbursement variance, revenue leakage, recovery, and financial intelligence sourced from CMS fee schedules, Medicaid payment data, RAC findings, and MAC audit results.

Commercial Value

HCVID enables healthcare organizations to identify and recover revenue leakage, optimize contract performance, reduce payment variance, and improve financial outcomes through actual payment intelligence.

Key Metrics

Metric	Value
Records	1,000,000
