

Population Health Risk Dataset

PHRD v1.0 — Read Me First

Welcome to PHRD v1.0

Thank you for acquiring the Population Health Risk Dataset from IntelligentPlatforms.net. This document provides essential guidance for working with this dataset.

Key Field Groups

Member_ID	Unique member identifier (PHRD-XXXXXXXX format)
RAF_Score	CMS Hierarchical Condition Category Risk Adjustment Factor score
Risk_Score	Overall population health risk score (0–100); higher = greater risk
Risk_Tier	Risk tier: Low / Moderate / High / Very High / Critical
HEDIS_Composite_Score	Composite HEDIS quality measure score (0–100)
HEDIS_Gap_Open_Count	Number of open HEDIS care gaps requiring intervention
SDOH_Flag	Whether member has any identified SDOH risk factor
SDOH_Risk_Score	Social determinants of health risk score (0–100)
Priority_Score	Composite intervention priority score (0–100); higher = more urgent
Opportunity_Score	Care management opportunity score (0–100)
Predicted_PMPM_Cost	Predicted per member per month cost (USD)
Readmission_Probability	Predicted 30-day readmission probability (0.0000–1.0000)
