

Readmission Risk Intelligence Dataset

RRID v1.0 — Release Notes

RRID v1.0 Release Notes

Version	1.0
Release Date	June 03, 2026
Classification	Class A — Operational Transaction Dataset
Certification	Platinum — Score 97.0/100
Record Count	1,000,000 records
Field Count	161 fields
Status	FTY 100% Approved — Initial Release

What's New in v1.0

- Initial release of the Readmission Risk Intelligence Dataset (RRID v1.0).
- 1,000,000 inpatient admission records across 161 intelligence fields spanning 12 domains.
- Sourced from CMS Medicare Inpatient Claims, HRRP, Hospital Compare, Care Compare, and Medicaid claims.
- Includes 30-day readmission probability, admission probability, and mortality probability for every record.
- Full financial intelligence: Admission cost, readmission cost, avoidable cost, PMPM impact, HRRP penalty risk.
- Full operational intelligence: Facility type, escalation, workflow risk, discharge delay, utilization review.
- 8 domain registries: DRG, ICD-10, HCC, Readmission Category, HRRP, Facility, Care Management, Quality Measures.
- Complete source lineage: every field carries Source_System, Source_Type, Confidence_Score, Transformation_Method.
- 4-tier distribution package: Sample (500), Developer (25K), Professional (250K), Enterprise/OEM (1M).
- D7 compliant: Business Glossary, Release Notes, and Authority Statement included.

Known Limitations

- Readmission probability scores are model-derived and should be validated against facility-specific baselines.
- HRRP penalty estimates are approximations based on CMS methodology; actual penalties may vary.
- SDOH flags are model-derived estimates based on geographic and demographic indicators.
